Product Benefits

Broaden your portfolio
Add the fastest possible broadband services to your product portfolio

Win more business
Win customers through offering fibre-based broadband services at significant speeds.

A growing footprint
We're already present on the main Spanish cities and we are committed to expanding our pure fibre coverage nationwide

A range of speed tiers
From 100Mbps all the way up to 1.24Gbps all symmetrical, we've got Ultrafast speed tiers to meet the needs of consumers and businesses alike.

Product Features

- **Layer 3** Ethernet packet-based wholesale network service with traffic delivery at a neutral node
- End-users identification by **DHCP**
- Connection to Onivia platform through **API** or **web portal**
- **Symmetrical bandwidth speeds** up to 1.24 Gbps
- Multiple OLT service profiles for different bandwidth and pre-configured QoS priorities for traffic

And also...

Commercial support in your business plan with **ready-made sales and marketing materials**.
